As the first region to be impacted by COVID-19, Asia-Pacific has become the testing ground for innovations and solutions to tackle this global disaster.

UNDRR’s Regional Office for Asia and the Pacific, as the UN focal point for disaster risk reduction, will be organizing over the coming weeks a series of webinars on the COVID-19 disaster. These webinars will disill in 60 minutes the most relevant information and actionable recommendations on priority topics to support countries in their prevention, response and recovery efforts. We will also share issue briefs on the webinar topics that capture emerging lessons and policy recommendations.
